PROFESSIONAL EXPERIENCE

Senior Full-Stack Web & Mobile Developer | **Freelance / Remote**
— **International Clients**

2019 – Present

- Delivered 100+ production-level web and mobile applications for startups and businesses across Germany, UAE, USA, UK, and Pakistan

- Architected and shipped full-stack systems end-to-end — from database schema and REST API design to pixel-perfect, mobile-first frontends
- Built AI-powered SaaS platforms integrating OpenAI API, real-time WebSockets, multi-role auth, payment systems, and cloud deployments
- Led frontend architecture on Next.js 14 projects with SSR, App Router, TypeScript, and CI/CD pipelines on Vercel
- Developed 35+ screen React Native mobile applications with Expo SDK for international clients
- Collaborated directly with non-technical founders — translating ideas into shipped products, managing timelines, and communicating in clear English throughout
- Consistently received repeat work and referrals — 80%+ client retention across all engagements

Frontend Developer | [Arfa Software Technology Park, Lahore](#)

Oct 2020 – Dec 2022

- Built and maintained responsive frontend components for enterprise-level web applications
- Worked in Agile sprints — participated in code reviews, standups, and sprint planning
- Collaborated with backend developers on API integration and Django template rendering
- Improved frontend performance and code maintainability through BEM architecture and CSS variables

SELECTED PROJECTS (100+ TOTAL — HIGHLIGHTS BELOW)

AutoMarket.de — German Automotive Marketplace

2024 – Present

[Next.js 14](#) · [TypeScript](#) · [NestJS](#) · [PostgreSQL](#) · [Tailwind CSS](#) · [Vercel](#) · [CI/CD](#)

- Architected a full-stack German car marketplace from zero — UI design, NestJS backend API, and PostgreSQL database schema covering the complete product lifecycle
- Built SSR-optimized pages in Next.js 14 App Router with TypeScript for SEO-critical car listing pages — critical for organic search visibility in Germany
- Designed multi-role authentication system (buyers, private sellers, dealerships) with JWT, protected routes, and role-based dashboards
- Built advanced search and filter UI: make, model, price range, mileage, year, location — with real-time responsive updates and mobile-first design
- Deployed on Vercel with CI/CD pipeline — zero-downtime deployments on every GitHub push

BeautyChain — Global Brand–Manufacturer–Influencer SaaS

2024

Platform

[React.js](#) · [Node.js](#) · [Firebase](#) · [OpenAI API](#) · [Supabase](#) · [REST APIs](#)

- Built a large-scale startup SaaS platform connecting brands, manufacturers, and influencers in one ecosystem — designed to support thousands of users
- Integrated OpenAI API for AI-powered matching with 0–100 scoring system, AI-generated explanations, contract generation, and business summaries
- Implemented milestone-based escrow payment structure, RFQ/campaign application flow, real-time messaging with file attachments, and PDF contract export
- Built role-based dashboards for 3 user types (Brand, Manufacturer, Influencer), influencer analytics, multilingual support, and full admin control panel
- Revenue model: commission on transactions (5–10%), subscription plans, featured listings, campaign management fees

Vunex.live — Ultra-Premium Trading Platform (In Progress)

2025

[React.js](#) · [Next.js](#) · [Three.js](#) · [WebSockets](#) · [Binance API](#) · [Node.js](#) · [PostgreSQL](#)

- Building a \$15,000 professional trading ecosystem featuring a 3D interactive terminal, real-time candlestick charts, live order book, and multi-pair Forex/Crypto trading
- Integrated real Binance WebSocket feeds for 16+ live pairs — BTC/USD, ETH/USD, EUR/USD, and Forex pairs with live price flash effects
- Built ultra-premium UI matching Bloomberg/Binance Pro quality — Deep Obsidian theme, glassmorphism panels, Electric Cyan accents, neon glow interactions
- Admin Suite with 100+ endpoint control center, P2P marketplace with escrow, and portfolio dashboard

Business Directory Platform — Django Full-Stack

2024

[Django](#) · [Python](#) · [HTML](#) · [CSS \(BEM\)](#) · [JavaScript](#) · [Bootstrap](#) · [Figma](#) · [Git](#)

- Led frontend architecture and UI refinement for a full-scale business directory platform with May 2024 production launch deadline
- Refactored large-scale inline CSS into modular BEM architecture with CSS variables — reduced style conflicts and significantly improved developer velocity
- Rebuilt authentication system, added Google Sign-in UI, enforced Figma design system alignment across all pages and three breakpoints
- Collaborated with backend developer (Django/Python) on template rendering and dynamic data integration

Vendour App — Smart Home & E-Commerce Mobile Application

2024

[React Native](#) · [Expo SDK 54](#) · [JavaScript](#) · [Custom Theme System](#)

- Built a fully functional React Native mobile app with 35+ screens — Login, Home Dashboard, Smart Home Controls, Shop, Magazine, Recipes, and Account Profile
- Designed centralized theme system (colors, spacing, radius, shadows) ensuring pixel-perfect consistency across all 35+ screens
- Implemented ExpandRow components, cart system, wishlist, search, notifications, and forgot password flows with useState-based navigation

AI SaaS Product Suite — 4 Platforms

2023–2024

[Next.js](#) · [OpenAI API](#) · [Firebase](#) · [Tailwind CSS](#) · [Vercel](#)

- AI Study Assistant — Next.js SaaS helping students generate summaries, quiz questions, and study plans from their own notes using GPT-4
- AI Content Humanizer — SaaS tool converting AI-generated text into natural, human-like writing for content creators and marketers
